

Computer / Electronic Technical Support

Quickstep Organizing's founder and principal, Déclan Córdova, is a Microsoft Certified Systems Engineer licensed in computer networking; he also holds a PC Technician certification in computer design and technical support. We specialize in computer and electronic technical support projects, as illustrated below:

Hardware / Software:

Our assistance may include desktop and laptop hardware and software set-ups, troubleshooting, Internet and email connections and configurations, individualized training, assembly of custom designed desktop computers, coordination with cell phones, laptops, call forwarding, and voice mailboxes, along with disposal and recycling of computers and electronics.

Networking and Connectivity:

For business and the home, we can assist with the configuration, set-up, and moving of networks. This may include server, workstation, cable, wiring, and wireless configurations.

Electronics:

We offer assistance with electronics. This may include document scanning, multi-media conversions, data storage and archive management, entertainment centers (cabled or wireless), home theater configurations, DVD, VCR, and TiVO connections and programming, Camcorders, Digicams, and Playstations.

As professional organizers, we at Quickstep Organizing understand the critical role of consolidated and streamlined information management. This may include working with clients to streamline data storage and retrieval, and to archive information when appropriate. We do what it takes to get the job done efficiently!
